## 2. Legal basis for processing personal information

The processing of personal data, such as the name, address, e-mail address, or telephone number of a data subject will always be in line with the General Data Protection Regulation (GDPR), and in accordance with the country-specific data protection regulations applicable to Avy B.V.

Data protection laws vary among countries, with some providing more protection than others. The laws of some countries may provide a lower standard of protection than under the laws of your country. The GDPR is globally considered as one of the most advanced privacy protection forms of legislation.

To process your personal data, we rely on the following legal basis, under EU data protection law:

Where we have obtained your consent, for example to action a request from you or respond to your specific query. You can withdraw your consent at any time, but we may still need to retain a record of your correspondence with us.

For the purposes of our legitimate interests, when necessary, such as for the following:

- Providing, maintaining, and protecting our services to meet the needs of our users.
- Developing new products and features.
- Detecting, preventing, and helping to address fraud, abuse, security, safety and technical issues with our service.
- Protecting against threats to the rights, property or safety of Avy, our users or the public as required or permitted by law.
- Performing research that improves our services for our users and benefits the public.

- Enforcing legal claims, including investigation of potential violations of applicable Terms of Service.

To comply with a legal obligation when necessary, for example under anti-money laundering or anti-bribery legislation.

In rare cases, the processing of personal data may be necessary to protect the vital interests of the data subject or of another person of interest. This would be the case, for example, if a visitor were injured in our company and his name, age, health insurance data or other vital information would have to be provided to a doctor, hospital or other third party. In the case of theft from our office and workshop, we'll hand over the footage shot by our security cameras to the police.

They are subject to strict contractual confidentiality obligations, and may be disciplined or terminated if they fail to meet these obligations.

In case third parties need access to data, we'll conclude a contract to make sure they only use it for the intended goal (except (investigating) authorities).
